

2017 Eagle Award for Health and Safety Excellence

Criteria

The **Safety Award** has an objective standard that is based on data reported to MSHA.

The basis of the selection is the operation that has worked with no reportable incidents in the prior calendar year. In the event of a tie, the location with the longest time period without a reportable incident will be selected.

There is a Large Quarry and Small Quarry award. The Large Quarry is based on operating over 36,000 man-hour in the calendar year. The tabulation for this award will be made by the GCAA office.

This Eagle Award for Health and Safety Excellence does not replace the GCAA Safety Award currently presented at the Management Workshop. The Eagle Award for Health and Safety Excellence is awarded to a single site and represents the highest achievement for safety over an extended period of time. It is designed to recognize that the goal for our industry is a zero tolerance for any injury.
