Because the concrete of the Hoover Dam was poured into individual, rectangular shaped sections, rather than with a single, continuous pour, the physical dam itself will survive up to 10,000 years.
If the Hoover Dam had been built in a single continuous pour, the heat produced by the curing concrete would’ve taken 125 years to cool to ambient temperatures.

OBSTACLES OR OPPORTUNITIES?
Obstacles are necessary for success.
Obstacles are necessary for success. Each struggle, each defeat, sharpens your skills and strengths, your courage and your endurance, your ability and your confidence. Each rebuff is an opportunity to move forward; turn away from them, avoid them, and you throw away your future.
